

# Development Project

**Due Date: August 9, 2017**

You will be/have been learning about what psychologists have to say about the human life cycle. Some theories that you will learn or have learned include **Piaget's theory of cognitive development**, **Kohlberg's theory of moral development** and especially **Erikson's Stage theory**. Your assignment is to *create a timeline outlining the events of your life and your life to come and put them into a scrapbook*.

How are you going to do this? First, think about what you have learned about human development. **Read Unit 9 of Myer's Psychology for AP**. How do you think this has played out in your life so far? How do you think it will play out in the future?

Put together a scrapbook on your life as it has happened so far **and how you imagine it will be**. The scrapbook should be at least 8 ½ x 11 inches or you may use a typical scrapbook if you like. It should have a cover/binder if you will be using regular unlined paper.

You must include a title page. You should decorate this and be creative!

For each section, you must write a response to the following questions:

How do your answers to these questions relate to what you read in the text? What psychological stages or milestones were happening, or *should have been happening* during this time?

Your responses should be detailed, and refer to the textbook as well as at least *one peer-reviewed* source. Please use APA style in-text citations, and an APA style reference page at the end. Here are some links to help you with APA format:
